What Sets OBXtek Apart

OBXtek is an experienced provider of cybersecurity and information security services to the government. We work with both unclassified and classified systems.

Our People

OBXtek's cybersecurity personnel are recognized experts in the field with multiple advanced certifications including the Project Management Professional (PMP), Certified Information Systems Security Professional (CISSP), Certified Ethical Hacker (CEH), Security+, Certified Authorization Professional (CAP), and Certified Information Security Manager (CISM).

Our Reputation

OBXtek provides one of the most comprehensive ranges of security services, including risk and vulnerability assessment, scanning, malware remediation and risk management. Our information assurance engineers, risk management engineers and other subject matter experts have extensive experiential knowledge of the Risk Management Framework (RMF) and Assessment and Authorization (A&A), which encompasses all risk management/mitigation functions associated with Federal Information Security Management Act (FISMA) and the NIST 800 series publications.

CYBERSECURITY

OBXtek employs experts in RMF and A&A, using proven techniques to eliminate unnecessary risk and protect the confidentiality of your data.

ENTERPRISE IT SERVICE MANAGEMENT

OBXtek has the expertise to accurately scope, design, implement, and manage IT.

IT ENGINEERING

OBXtek delivers a forward thinking, full lifecycle approach of strategy, assessment, architecture, deployment and maintenance.

SOFTWARE, CLOUD AND MOBILITY

OBXtek's flexible CMMI Level 3 approach results in forward leaning, cost-effective and secure applications.

LOGISTICS

From Acquisition Support to Logistics, Training and Professional Services, our Logistics Practice experts turn data into actionable insights to solve real-world problems.

INTELLIGENCE

OBXtek identifies, curates and produces intelligence products that provide valuable, actionable intelligence and enable customer mission success.

System Assessment and Authorization (A&A)

OBXtek brings a deep understanding of system risk and risk mitigation strategy, providing A&A services to multiple federal organizations. OBXtek personnel hold and maintain multiple advanced certifications to ensure the proper knowledge, skills, and abilities required for professionals involved in the process of authorizing and maintaining information systems.

Vulnerability Scanning, Intrusion and Malware Detection

OBXtek's experts design, develop, and oversee implementation of security architecture, including authentication services, prevention systems, vulnerability assessments, and systems and applications. Our comprehensive capabilities allow OBXtek to offer enterprise-wide technical support, monitor intrusion detection, report on potential vulnerabilities, and provide mitigation recommendations based on the latest threats.

Information Assurance/Cybersecurity Role-based Training

OBXtek's experienced instructors are current on information assurance and cybersecurity issues spanning from the newest threat or vulnerability to government policies and procedures to risk management guidelines. OBXtek provides instructor-led information assurance/cybersecurity training across the globe with classrooms (some in geographical hotspots) and online.
